Display Customer PO on open shipments page

Customer PO entered at time of order entry will display on every shipment.

This can be especially helpful if the order is not shipped from a HUB warehouse.

SAME DAY SHIPPING

Group categories by name on reorder dashboard

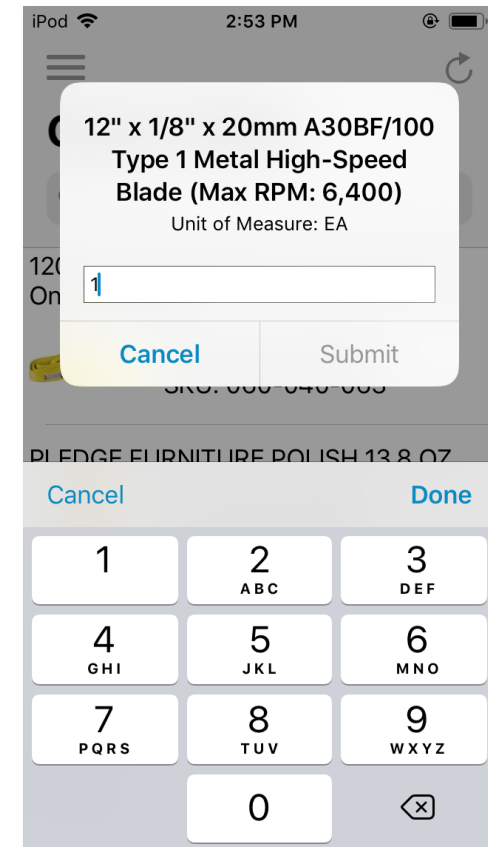

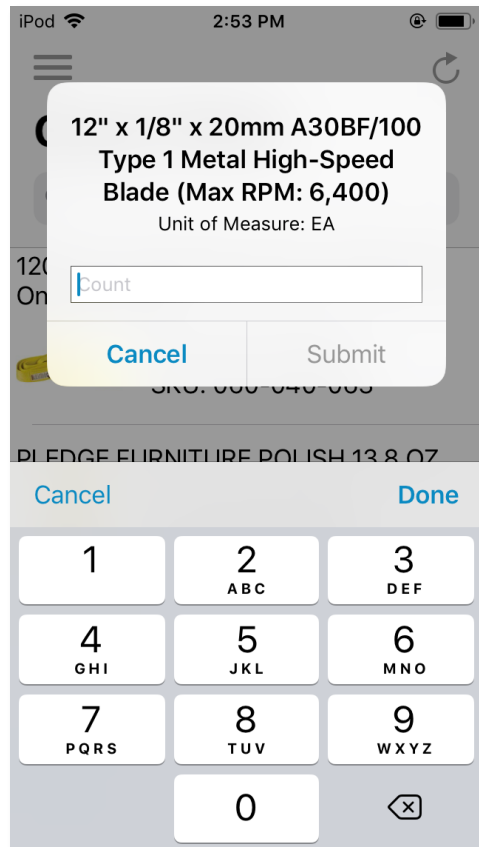

If there are multiple Inventory IQ accounts under one login, the categories will be grouped by name to prevent showing duplicate category names.

IQB-32

Allow item scan to count during Cycle Count (2nd Gen Hardware)

The first scan will pull up the item. All subsequent scans will add one to the quantity.

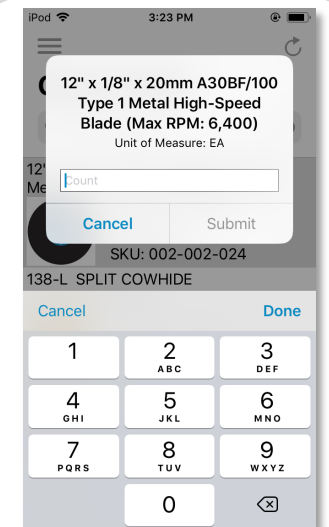

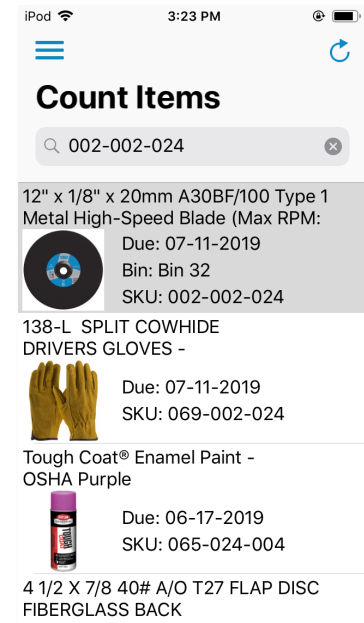

IQB-79

Include Unit of Measure and bin on Cycle Count
(2nd Gen Hardware)

The bin is displayed on the recommended count page.

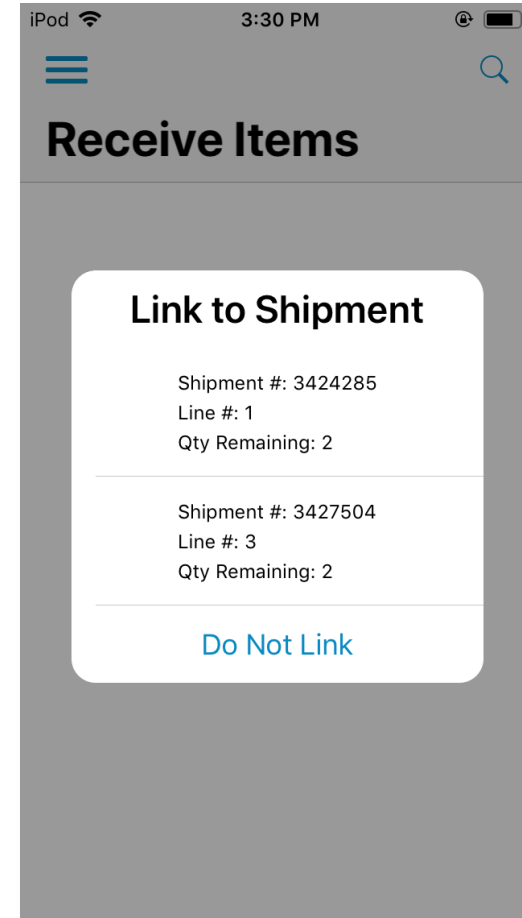

The UOM is displayed on the count page.

IQB-77

Suggest open shipments when receiving items

When an item is scanned or selected while receiving an item it will display any open shipments and allow you to link the receive to it.

WWW-814

Attach bin to shipment items if they are setup in IQ (2nd Gen Hardware)

If there is a known bin location
for an items on a shipment
receipt it will be displayed.
